Advice to All Those Hiding In Their Covid Caves

Here I am in my covid cave
6 times bigger than a standard grave.
But I have what I need to drink and eat
And my soft feather mattress just can't be beat.
I've got wi-fi and a Dell lap-top
And can listen to music be it classic or pop.
If I want to travel to any destination
I google it, and without hesitation
I can go on a voyage long or short
And whenever I please, I can simply abort.
I've got running water, a stove and a shower
As well as a toilet and electrical power.
I also have AC but I never turn it on.
I just open the window till the heat is gone.
Yes here I am in my covid cave
Heating tea and coffee with my microwave.
To access songs I just type their names
And can also enjoy playing video games.
To hear the news, I type "wn"
And in no time learn about what's happenin'
In the US or even worldwide
Without ever having to go outside.
One could say I have all I need
But if you think thusly, you're mistaken indeed!

A life without others has no purpose at all
And without ever haven fallen
You can never stand tall.
To enjoy life, your wealth must be shared
Otherwise your life is greatly impaired.
For all those who live in an ivory tower
You must realize that there's a higher power
You can't take it with you, the wise men say.
So you'd better start sharing without delay.
Life's not eternal for we all shall die.
This is a fact, we can not deny.
So all who dwell in a covid cave
Remember that cave will become a grave.
And at your funeral you'll want others to say
This man or woman helped others to bear
Their woes and problems, and did happilly share
His or her wealth with those in need
And thus lived a life that was worthwhile, indeed.
For all of you who are obsessed with wealth
Take heed, for this can affect your health,
And no matter how high your ivory tower
It will be destroyed by a greater power
And this is a reckoning applying to all
The higher the tower, the longer the fall.
